

CASE STUDY: **Coca-Cola Enterprises** **STEPPED ACCESS TO THE MODULAR CABIN**

REQUIREMENT: Able-bodied access to the cabin.

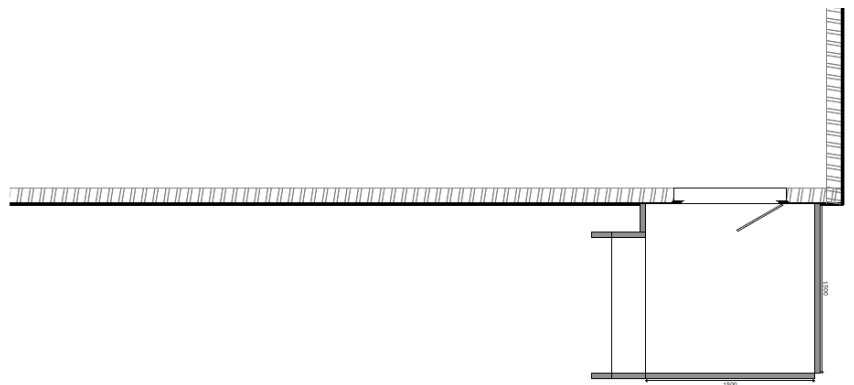

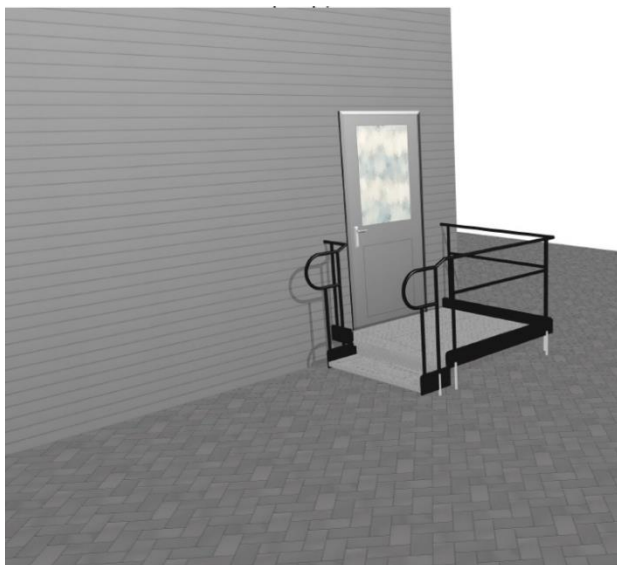

ADDITIONAL INFORMATION: We quoted and produced technical and CAD drawings, with reference to the finished floor height measurement supplied by the modular building company.

Application: Modular Building

Location: Wakefield, West Yorkshire

System: Standard Step System

Service Package: Supply & Install

END RESULT: Our expert installers fitted a step system as shown.

FEATURES INCLUDED:

- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.
- Trombone Ends - these are added to the ends of a step system to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Standard Continuous Handrail - this handrail system ensures users always have support to hold onto.
- Standard Colour Black - ramps are powder-coated black, to create a durable finish that is tougher than conventional paint.

THE COMPLETE RAMP PACKAGE: An all-inclusive, stress-free option which we managed in-house.

This package includes a site survey (if applicable), quotation, CAD and technical drawing, supply, and installation.

“

The system looks great, thank you.

Project & Aftercare Co-ordinator
