

CASE STUDY: DISABLED TOILET RAMP, KENT

AN ADJUSTABLE WHEELCHAIR RAMP OVER A WATER TANK

BACKGROUND: New temporary welfare units including disabled toilets were in construction in Kent, as part of a government-funded project.

REQUIREMENT: Modular ramps to provide long-term access for visitors and staff of all abilities.

Systems required to be installed within the tight schedule of a week. Plus, be easy to disassemble once the site is decommissioned.

END RESULT: Rapid Ramp successfully delivered the project within the week deadline and matched the units' hire period.

The ramps were designed with standard walkways to accommodate the limited space available between the buildings.

Plus, the telescopic legs could be adjusted to sit over the site's water tank, preventing it from having to be moved.

Once the site is decommissioned, the ramps will be removed, ready to be reused on other projects.

FEATURES INCLUDED:

- Mesh Platform - this self-draining mesh platform allows water to pass through rather than puddle on the surface and potentially freeze.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate threshold heights.
- Standard Handrail - this handrail system ensures users always have a support to hold onto.
- Standard Colour Black - ramps are powder-coated black to create a hard finish that is tougher than conventional paint.

Application: Commercial

Location: Kent, South East

System: Standard Ramp System

Service Package: Ramp Rental

RAMPS & STEPS FOR PREFABRICATED BUILDINGS:

Like modular buildings, our ramps & steps are prefabricated systems, carrying benefits including:

- A fast construction time - Ramp installations are typically completed within a 1 to 2-day turnaround time. Components are manufactured and stored in-house.
- Easy to remove – Once no required, ramps can be disassembled within a few hours.
- Design and build flexibility - Ramps can be re-designed and re-configured to suit different sized areas.
- Cost-effective – Our access ramp has a life span of over 25 years with no maintenance costs.
- Environmental benefits – Ramp components can be reused under our ramp recycling scheme.
- Safety features - Includes handrails for grip and a slip-resistant mesh platforms as standard.
