

CASE STUDY: [Front Door Ramp](#), Woking

REQUIREMENT: A ramp to the entrance of the council house.

Application: Residential

Rapid Ramp's demountable system was ideal as it requires no groundwork.

Location: Woking, Surrey

Once no longer needed, the ramp can be removed and reinstalled at a different property owned by the council.

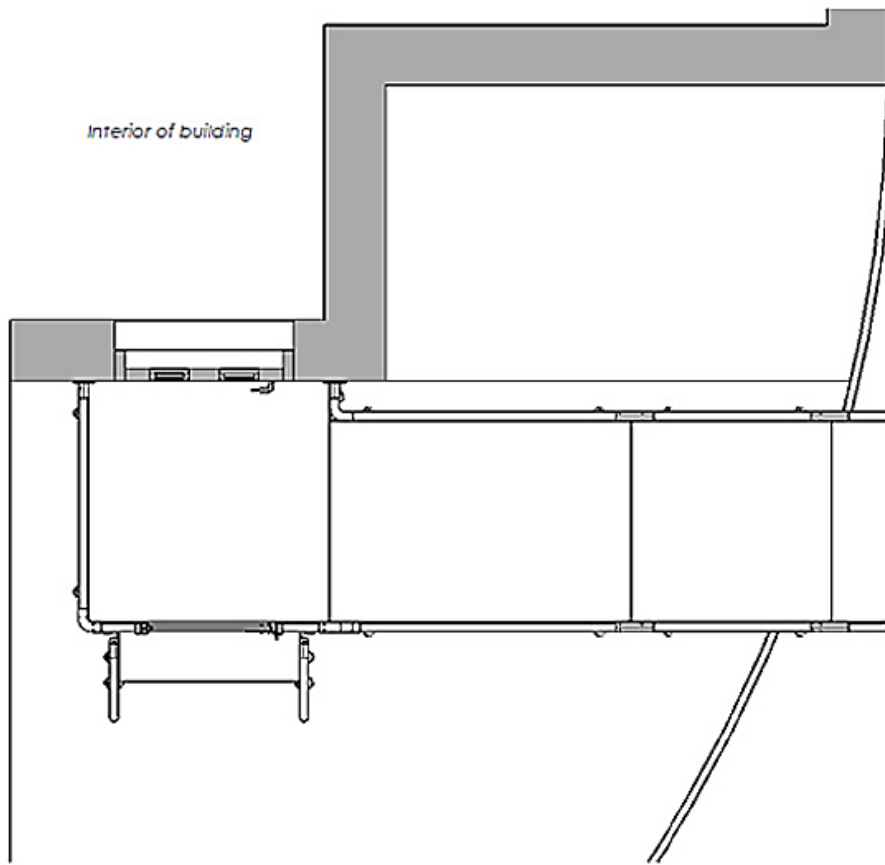

System: Standard Modular ramp

ADDITIONAL INFORMATION: CAD drawings were produced from pictures and measurements taken by our in-house site surveyor.

Service Package: Supply & Install

The drawings were supplied to the client with their quotation.

END RESULT: The ramp was installed to the front door in only a few hours. The system fully complies with [Document M, Volume 1, Dwellings](#).

FEATURES INCLUDED:

- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Standard Handrail - this handrail system ensures users always have support to hold onto.
- Powder coated Finish – Rails are coated with thermosetting powder to provide a non-conductive, non-slip and scratch resistant surface.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.

EXTRA FEATURE INCLUDED:

- Step & Gate Unit - access for able-bodied users.
