CASE STUDY: KING'S COLLEGE NHS HOSPITAL

900mm wide ramps for the Neuroscience Offices

> **REQUIREMENT:** Modular Ramps and steps from the main entrance, plant room and fire exit.

> **ADDITIONAL INFORMATION:** Due to the limited space available, the platforms needed to be 900mm wide.
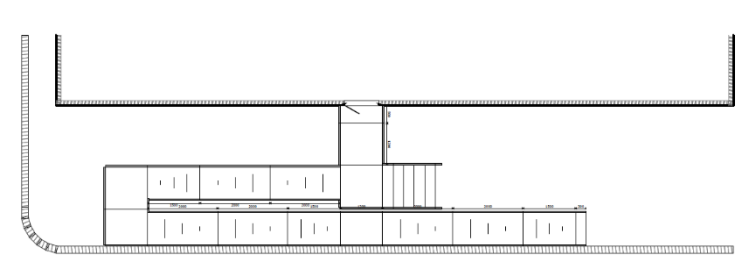

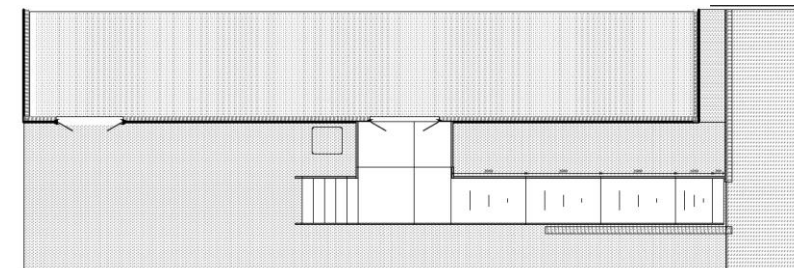

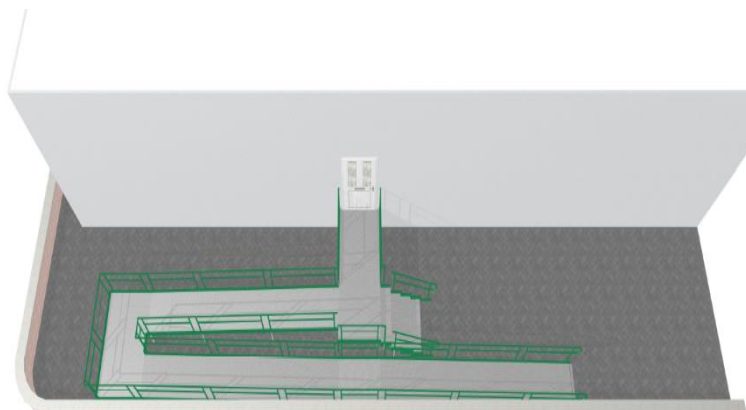

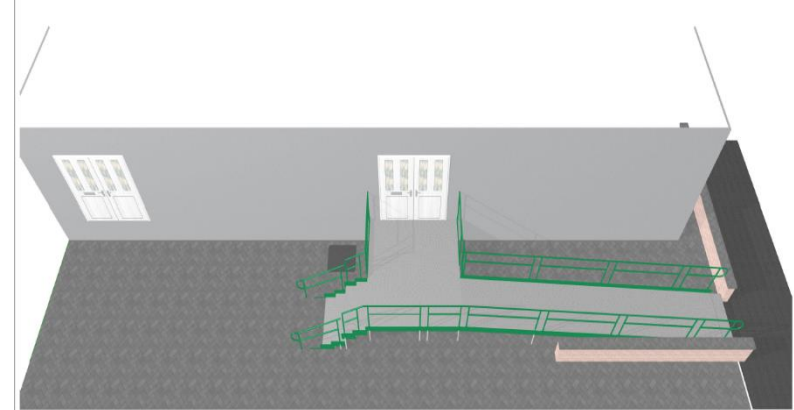

The following CAD and technical drawings were designed by our specialist CAD designer in-house, from measurements and photos taken by our site surveyor.

Application: Modular Building

....

Location: Denmark Hill, London

....

System: Standard Ramp System & Step System

....

Service Package: Supply & Install

....

END RESULT: Our installers fitted a Rapid Ramp from the fire exit and main entrance. A step system was installed from the plant room entrance.

All work was completed within two-day turnaround time.

FEATURES INCLUDED:

- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Standard Handrail -this handrail system is designed to be grasped by the hand, to provide stability or support.

EXTRA FEATURE INCLUDED:

- Step Unit with Yellow Tread – an ideal addition to any ramp installation, providing the access needed for able-bodied users.

A BENEFIT OF MODULAR ACCESS PRODUCTS:

Modular ramps and steps can be configured into various combinations to suit different sized areas.

Widths available:

- 900mm – the recommended width for dwellings under Document M, Section 6 of the Building Regulations.
- 1000mm – our standard ramp for dwellings.
- 1200mm – our slightly wider ramp.
- 1500mm – the recommended width for ramps for public buildings.

Alternatively, you can request a bespoke width.
