

CASE STUDY: Lorry Park, Kent

BACKGROUND & REQUIREMENT: The park delivers customs and document checks on cross-channel lorries.

Wheelchair access over the temporary external cabling and pipework was required.

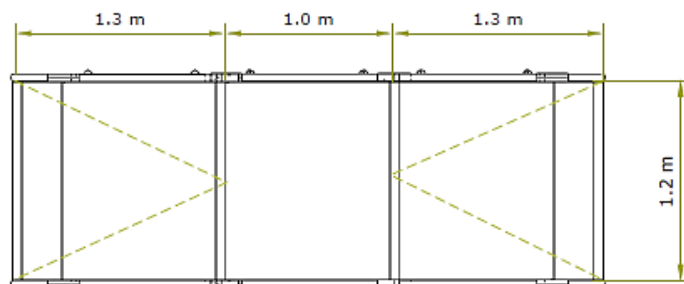

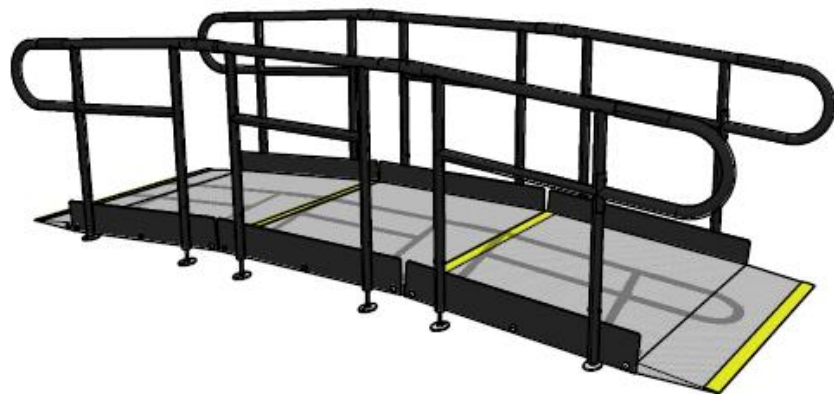

ADDITIONAL INFORMATION: CAD and technical drawings were designed by our specialist designer in-house.

Application: Public Building

Location: Kent, South East

System: Standard Modular Ramp

Service Package: Ramp Hire

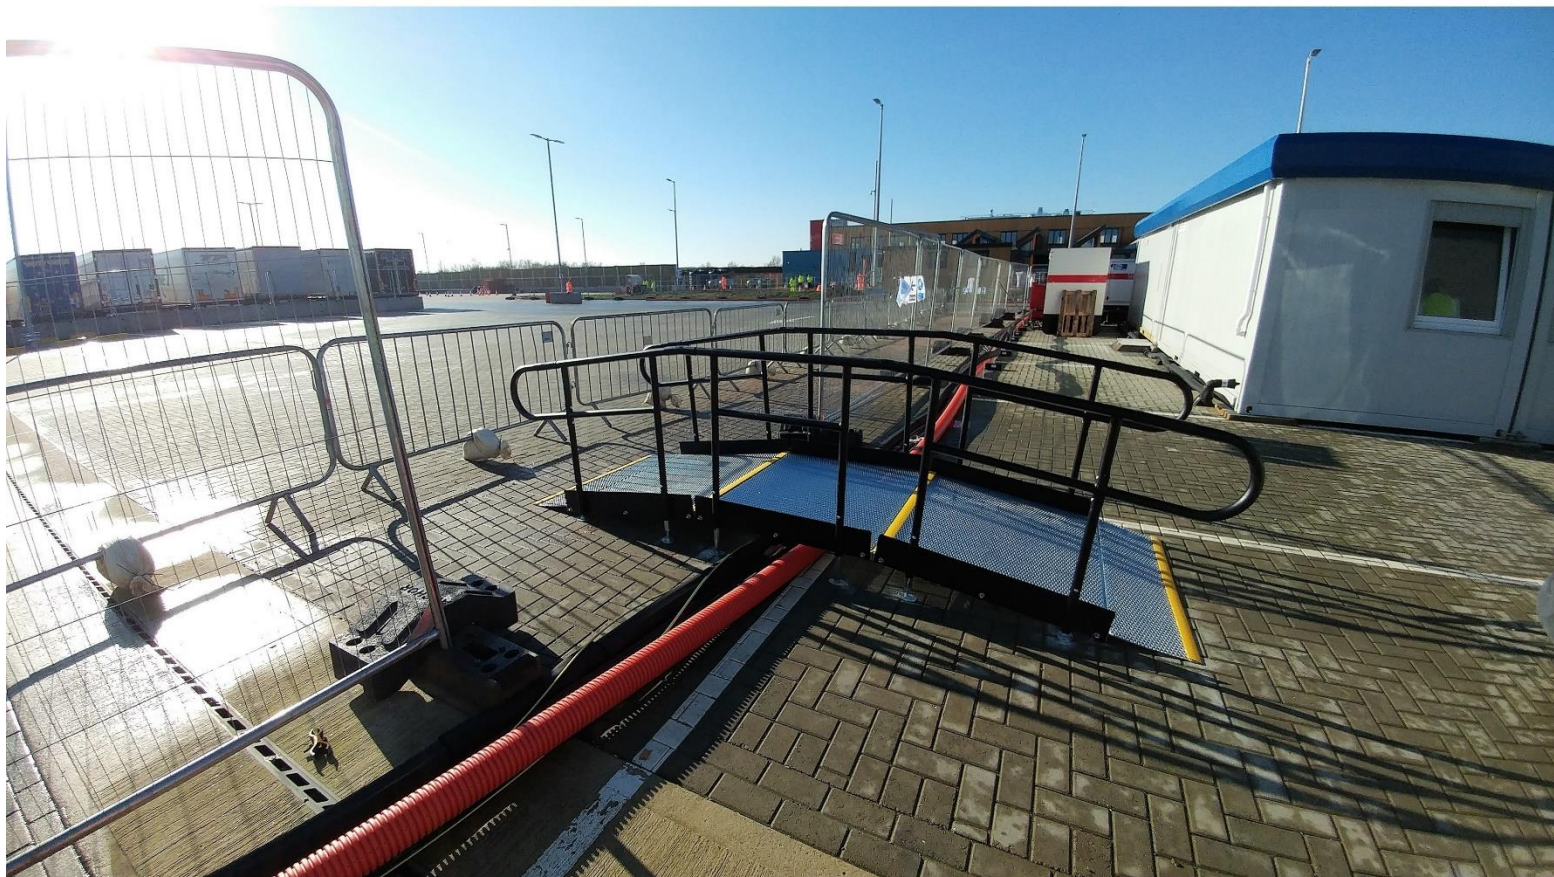

END RESULT: Once the pipes and cabling were in place, a temporary ramp was installed over the items within an hour.

The ramp was designed with a 1:12 gradient to provide sufficient height.

Once no longer required, the ramp components will be dismantled and stored in our warehouse, ready to be reused on other [ramp hire projects](#).

FEATURES INCLUDED:

- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Standard Colour Black - ramps are powder-coated black to create a hard finish that is tougher than conventional paint.
- Standard Handrail - this handrail system is designed to be grasped by the hand, to provide stability or support.

Access ramp hire:

Temporary Rapid Ramps and steps are available for long or short-term hire.

Once no longer needed, our installers will remove the system, leaving the area in its original condition.

The minimum hire period applies, and the rental duration is flexible (more details available on application). [>>Further information on ramp hire<<](#)
