

MLB Retail Store, London Stadium

PROJECT BACKGROUND & REQUIREMENT:

During the 2023 MLB London Series, a two-game showdown unfolded between the Chicago Cubs and the St. Louis Cardinals at London Stadium in Queen Elizabeth Olympic Park.

Temporary modular ramps and steps were hired to provide easy access to the prefabricated Retail Store.

Similar to the structure itself, our access solutions are fully reusable and simple to dismantle, allowing for convenient relocation and reinstallation at new sites. This flexibility is a key benefit that permanent concrete or timber ramps can't offer, as these are typically single-use and often discarded in landfill after removal.

DESIGN PHASE:

Our in-house design team produced a detailed 3D model and 2D plan, providing the customer with comprehensive visualisations of the project. These were included with their quotation.

Ramp

INSTALLATION:

Once the building structure was in place on the stadium concourse, we efficiently supplied and assembled a temporary ramp and step system within a two-day turnaround time.

After the conclusion of the 2023 MLB London Series, we promptly removed the systems within a few hours, returning the components to our rental inventory for their next use.

FEATURES INCLUDED:

- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Anti-climbing Infill Handrail - Prevents users from climbing or falling through gaps.
- Continuous Handrail - Provides unbroken support for users to hold onto.
- Standard Colour: Black - Powder-coated black finish for greater durability than traditional paint.
- Adjustable Telescopic Legs - Adaptable to various threshold heights.
- Slip-Resistant Yellow Tread - Enhances safety by making step edges and level changes more visible to those with impaired vision.
- Rest Platform - A rest platform is required at a height of 5 metres to provide users with a place to pause.
- The 1100mm High Handrails - The system is designed to attach to any level sections, offering additional safety and support.

EXTRA FEATURE INCLUDED:

- Solid Hoarding - Purposefully designed mesh deters unauthorised access to the ramp's underside, making it a popular choice for schools and other public buildings.
