

MLB Retail Store, London Stadium

BACKGROUND & REQUIREMENT:

During the 2023 MLB London Series, a two-game showdown unfolded between the Chicago Cubs and the St. Louis Cardinals at London Stadium in Queen Elizabeth Olympic Park.

REQUIREMENT:

Temporary modular ramps and steps were leased to facilitate entry to the prefabricated MLB Retail Store.

Like the structure, our access solutions are reusable and easily demountable, enabling future reinstallation at a different location. This is an advantage that neither concrete nor wooden ramps can provide, as they are single-use systems.

CAD DRAWINGS:

The CAD illustrations were generated with reference to the technical drawings supplied by the client and from our site surveyor's notes.

SERVICE PACKAGE

Ramp Rental

END RESULT:

After the construction of the building structure on the stadium concourse, we provided and assembled a temporary ramp and step system with an efficient one-day turnaround time.

After the conclusion of the 2023 MLB London Series, we promptly removed the systems, returning the components to our rental inventory for their next use.

FEATURES INCLUDED:

- Infill Handrail - This component is designed to prevent users from climbing or falling through gaps.
- Yellow Tread - This safety feature aids individuals with impaired vision in identifying the ramp's edge and any changes in level.
- Trombone Ends - These additions are placed at the ends of a Rapid Ramp to prevent clothes from snagging.
- Mesh Platform - The self-draining mesh allows water to pass through, preventing water accumulation on the surface.
- Continuous Handrail - This handrail system ensures that users always have a support to hold onto.
- Standard colour: Black - The ramps come in a powder-coated black finish, ensuring durability that surpasses conventional paint.

EXTRA FEATURE INCLUDED:

- Solid Hoarding - This skirt is purposefully designed to deter unauthorised access to the underside of the ramp, making it a frequent choice for schools and other public buildings.
