

## CASE STUDY: Mohammedi Park Complex

**REQUIREMENT:** An urgent need arose for four temporary marquee ramps, with two designated for each toilet block, all within swift turnaround.

These ramps were to replace makeshift wooden structures that posed a slipping hazard and lacked the provision of handrails.

**Application:** Modular Buildings

**Location:** Northolt, West London

**System:** Standard Modular Ramps

**Service Package:** Supply & Installation

**END RESULT:** Four Rapid Ramp Systems were efficiently installed within a brief two-day period, aligning with the marquee hire duration.

Feet fixings were unnecessary; the systems' weight ensured their secure placement over the plastic ground matting. Dismantling was scheduled after the event was complete.

A wooden ramp would have been unsuitable due to its tendency to rot and become slippery in wet weather.

### FEATURES INCLUDED:

- Trombone Ends -These are installed at the ends of a Rapid Ramp to prevent clothes from snagging.
- Telescopic Legs - These legs can be adapted to accommodate various threshold heights.
- Standard Handrail - This handrail is designed for hand gripping, offering stability and support.
- Mesh Platform - The self-draining mesh allows water to pass through instead of pooling on the surface.
- Standard Colour: Black - Our ramps feature a powder-coated black finish, ensuring longevity that exceeds the performance of typical paint.
