

## Crystal Palace Training Ground

### REQUIREMENT:

The design and construction of a raised modular walkway for photographers' use, offering an elevated vantage point above spectators for optimal coverage of the football pitch.

### DESIGN PHASE:

Our surveyor conducted an on-site assessment to gather measurements. Subsequently, our internal drawing team used these to create 2D and 3D illustrations of the walkway.

### APPLICATION

Public Building

### LOCATION

Beckenham, London

### SYSTEM

Fully Compliant Walkway  
& Step Units

### SERVICE PACKAGE

Supply & Install

Site Plan

## END RESULT:

Once the enabling works were complete, our fitting team installed a fully compliant walkway on the site's level concrete pad in just three days.

The system was powder-coated white to blend seamlessly with the club's aesthetic.

For outdoor access requirements such as this, our product is ideal. It's galvanised for lasting resistance against rust, with a zinc coating that reliably shields against moisture and oxygen to ensure durability in exposed environments.

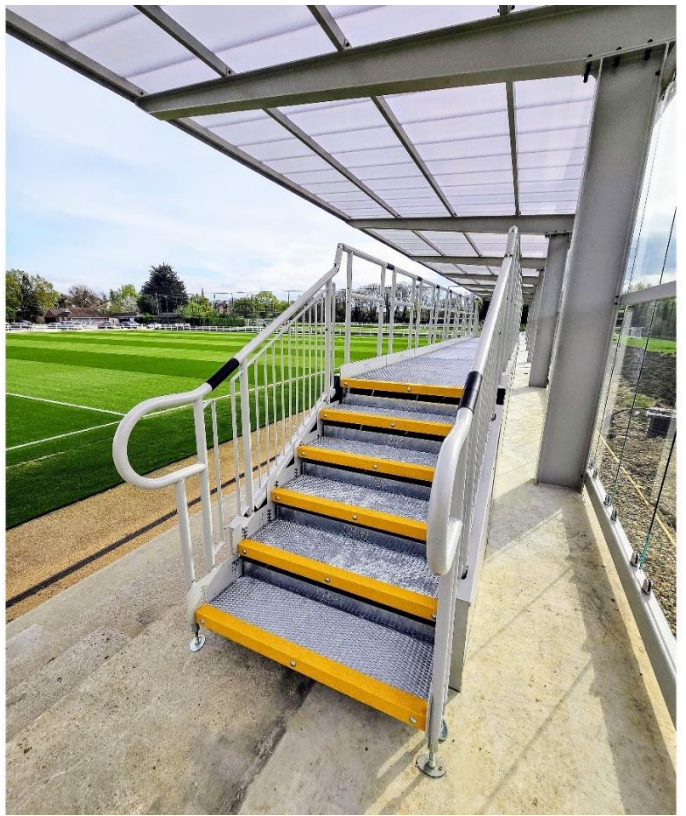

In addition, all components—apart from the platforms and legs—are finished with a premium powder coating, providing a tougher, more durable surface than conventional paint and ensuring dependable performance even in the harshest conditions.

### FEATURES INCLUDED:

- Infill Handrail - This product safeguards against users climbing or falling through gaps.
- Yellow Tread - A safety feature designed to help those with impaired vision identify the system's nose and any level changes.
- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Continuous Handrail - This handrail system ensures that users always have a support to hold onto.
- 1100mm High Rail - these handrails attach to any level sections.
- Standard Colour: Black - Our walkways have a powder-coated black finish that is more durable than typical paint.
- Adjustable Telescopic Legs - These can be adapted to suit various threshold heights.
- Fully Compliant Step Units - The perfect companion to any ramp or walkway setup, delivering the necessary access for able-bodied users. They can also function as standalone units, operating independently of the ramp system.
- Solid Hoarding - This skirt is purposefully designed to deter unauthorised access to the underside of the walkway, making it a frequent choice for schools and other public buildings.

Do you require modular  
ramps and steps?
