

CASE STUDY: **Peacehaven**

A MODULAR RAMP FOR A MOBILE HOME

REQUIREMENT: Wheelchair access to the semi-permanent home.

Since the property is not privately-owned, a demountable access system was required in case the occupant was ever to relocate.

ADDITIONAL INFORMATION: It was discussed with the specifier how our system's modular design would allow removal in the future to be straightforward, without leaving an impact on the property.

CAD and technical drawings were designed by our specialist CAD designer in-house along with a quotation.

Application: Residential

Location: Peacehaven, East Sussex

System: Standard Ramp System

Service Package: Supply & Install

END RESULT: Our team installed the Rapid Ramp within a few hours and it could be used instantly by the end-user.

FEATURES INCLUDED:

- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Standard Handrail - this handrail system is designed to be grasped by the hand, to provide stability or support.
- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.

WHY CHOOSE RAPID RAMP?

The Rapid Ramp System offers a level of flexibility that other ramp products cannot match.

It's easily removable and can be adjusted to suit the available space at most properties.

The ramp is perfect, we use it every day. It's an excellent product. We would always recommend Rapid Ramp!
