QUESTIONS AND ANSWERS

Q. How big will the ramp be?

A. It will be designed to have a safe, easy to use gradient recommended by the Building Regulations.

Q. How long will it take to install the ramp?

A. It generally will take a day to complete unless there is extensive work needed.

Q. The ramp is bigger than I expected?

A. If it was made smaller, you'd find it too steep to push a wheelchair up.

Q. What happens if there is an issue with the access product?

A. Products are guaranteed for three years. We have been installing ramps successfully for more than 20 years and would expect a 25+ year life span.

Q. What maintenance will I have to do?

A. Very little maintenance is required. We recommended sweeping dirt from the walkway and wiping down the rails with soapy water twice a year.

Q. How do I book a site survey?

A. Contact our sales team.

Q. What colour will my system be?

A. Black is the standard handrail colour. Handrails are powder-coated to create a durable finish that is tougher than conventional paint.
