

**Application:** Healthcare

**Location:** St Leonards-on-sea, East Sussex

**System:** Standard Ramp System

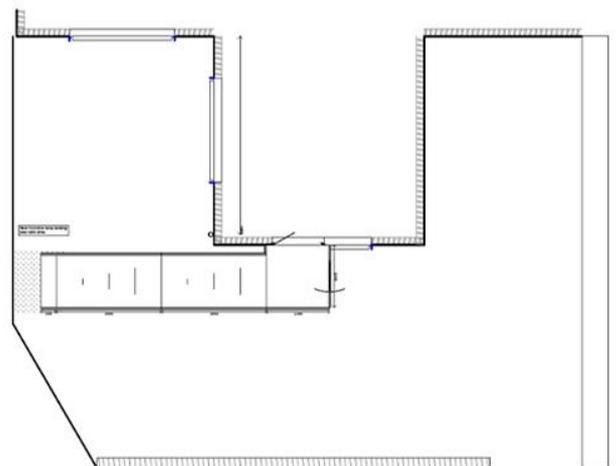

**Service Package:** Supply & Install

## CASE STUDY: **Sedlescombe House Surgery** **A DISABLED RAMP INSTALLED ON A SATURDAY**

**REQUIREMENT:** Wheelchair access to the building.

**ADDITIONAL INFORMATION:** We agreed to the surgery's request that installation should take place out of opening hours, to prevent disturbing the weekly running of the building.

We made a quotation and our designer created the relevant technical and CAD drawings.

**END RESULT:** A Rapid Ramp was installed free of charge on Saturday as a goodwill gesture.

**FEATURES INCLUDED:**

- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Standard Continuous Handrail - this handrail system ensures users always have support to hold onto.

**EXTRA FEATURE INLCUDED:**

- Gate Unit – this product provides access for abled bodied users.

**THE COMPLETE RAMP PACKAGE:** An all-inclusive, stress-free option which we managed in-house.

This package includes a site survey (if applicable), quotation, CAD and technical drawing, supply, and installation.

**“ Thank you for all the teams help, nice to use a local company. ”**
