

CASE STUDY: Southend University Hospital

REQUIREMENT: Access to the prefabricated endoscopy unit.

Like the unit, our modular ramp system is demountable and easy to relocate to suit different site changes.

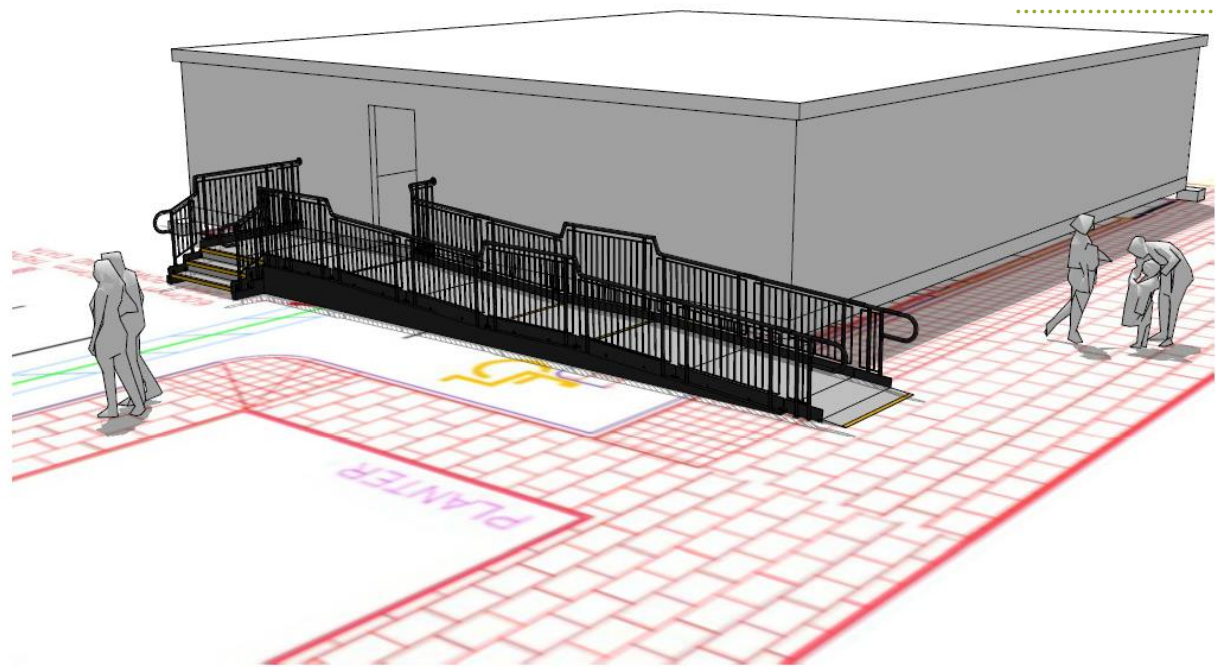

ADDITIONAL INFORMATION: 2D and 3D CAD drawings were created by our designer in-house. These were given to the client with their quotation.

Application: Healthcare

Location: Westcliff-on-Sea, Southend-on-Sea

System: Fully Compliant Modular Ramp

Service Package: Supply & Install

END RESULT: The ramp included a 1:15 gradient and fully compliant with documents M & K of the building regulations.

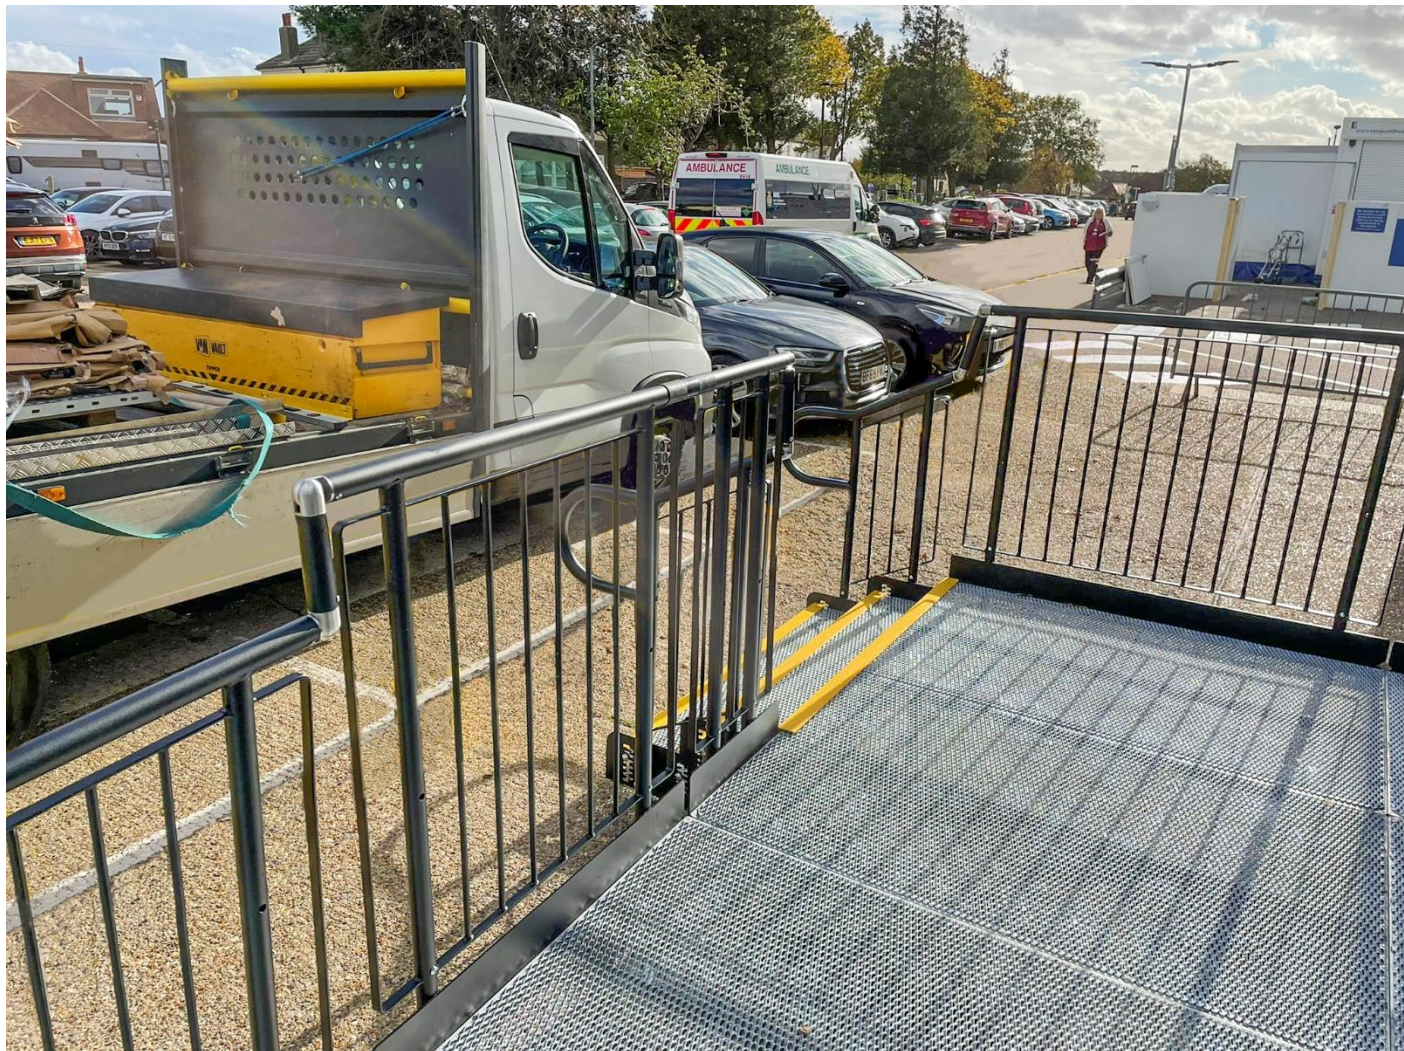

FEATURES INCLUDED:

- Infill Handrail - this product prevents users from climbing or falling through gaps.
- Yellow Tread - this is a safety feature designed to help those with impaired vision identify the nose of the ramp. Additionally, it helps users distinguish any level changes.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Rest Platform – a rest platform at 5 metres is required to allow the user to pause.
- 1100mm High Rail – these handrails attach to any level sections.
- Continuous Handrail - this handrail system ensures users always have support to hold onto.

EXTRA FEATURE INCLUDED:

- Fully compliant step unit – complies with Document M and K of the building regulations.
