

CASE STUDY: St Mary's Llanvair Discoed Church

PROJECT BACKGROUND: The medieval church was one of hundred venues chosen within the area to act as polling stations where electors could cast their votes.

REQUIREMENT: A temporary ramp to overcome the historic stone steps without causing damage to the site.

The installation was scheduled the day before Election Day, and removal was planned the following morning.

ADDITIONAL INFORMATION: Two factors taken into account during the planning phase included:

1. The entrance opened onto a road, resulting in minimal runoff.
2. The site was situated on an incline.

These are common challenges we address through tailored designs.

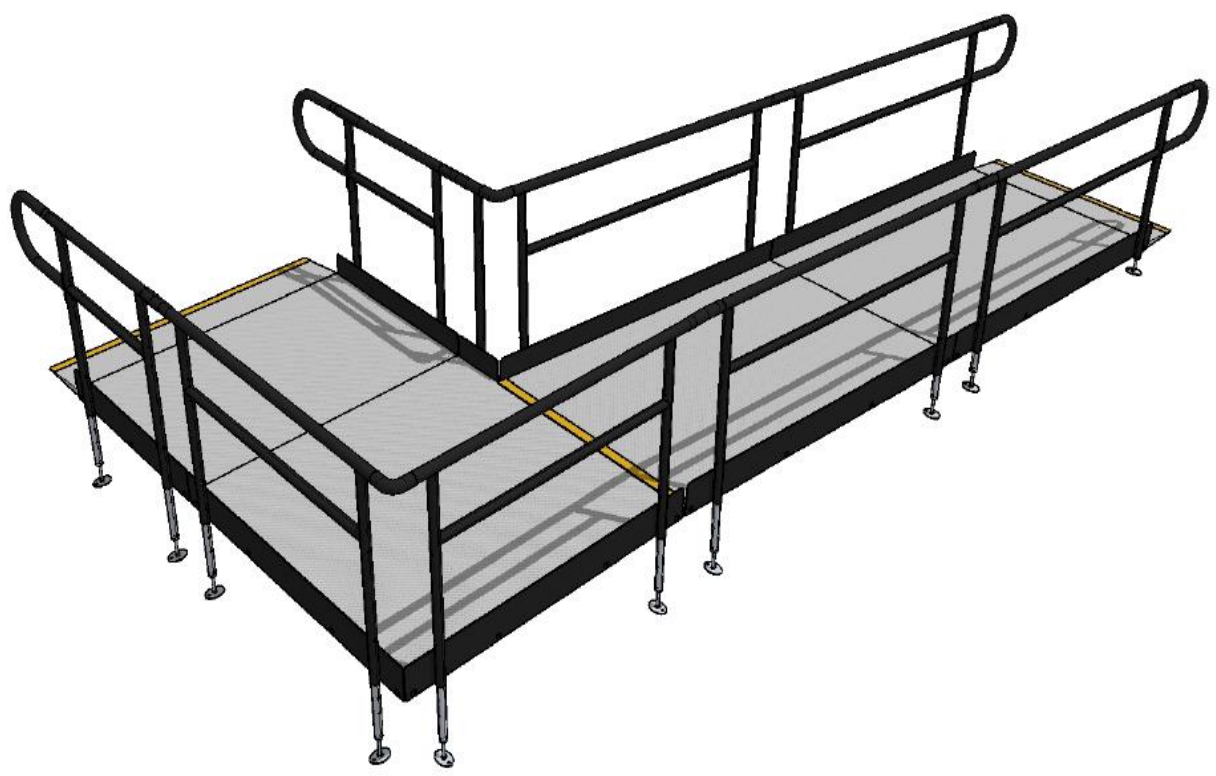

Application: Heritage

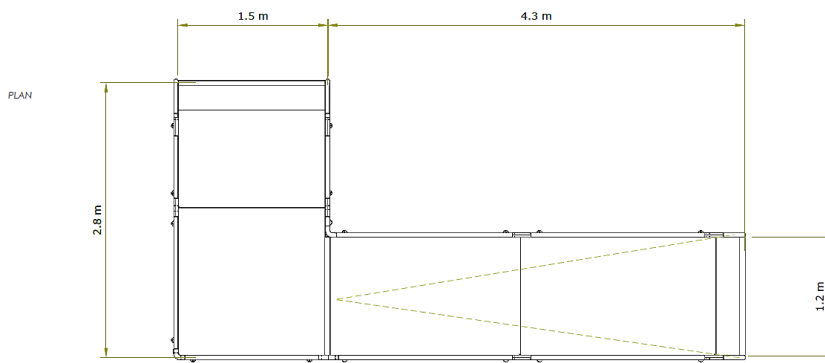

Location: Llanvair-Discoed, Chepstow

System: Standard Modular Ramp

Service Package: Ramp Rental

PERSPECTIVE

END RESULT: Our in-house installers swiftly fitted the temporary modular ramp within a few hours on the eve of the election.

It was efficiently dismantled shortly after the election, leaving the site undamaged. All components will be reused in future rental projects.

FEATURES INCLUDED:

- Standard Handrail - Ensuring users always have support to hold onto.
- Trombone Ends - Added to the ends of a Rapid Ramp to prevent clothes catching.
- Mesh Platform - Self-draining mesh allows water to pass through rather than collect on the surface.
- Black Powder Coated Finish - Rails are coated with thermosetting powder, providing a non-conductive, non-slip, and scratch-resistant surface.
- Telescopic Legs - Adjustable to accommodate different threshold heights.

EXTRA FEATURE INCLUDED:

- Yellow Tread - A safety feature aiding those with impaired vision to identify the nose of the ramp and any level changes.
