

Application: Modular Building

Location: Construction Site, Kent

System: Standard Steps

Service Package: Ramp Rental

CASE STUDY: **Construction Site, Kent**

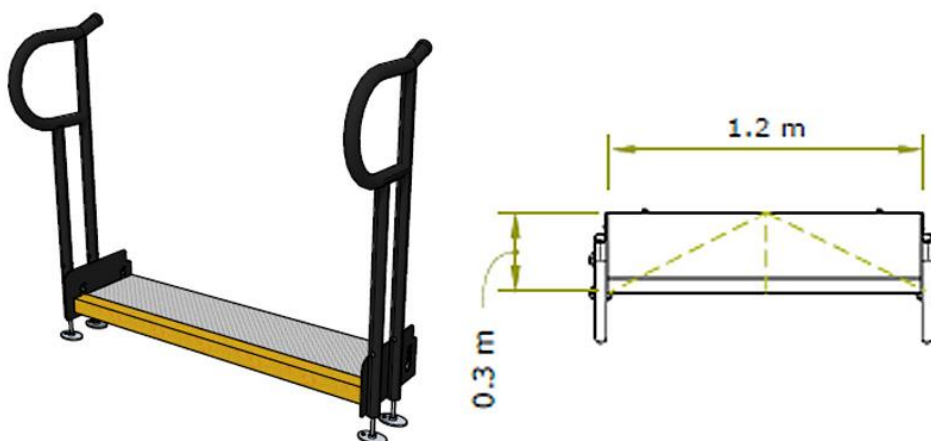

REQUIREMENT: Temporary step units and ramps to the welfare cabin.

Once the construction works are completed, the building and step systems will be dismantled.

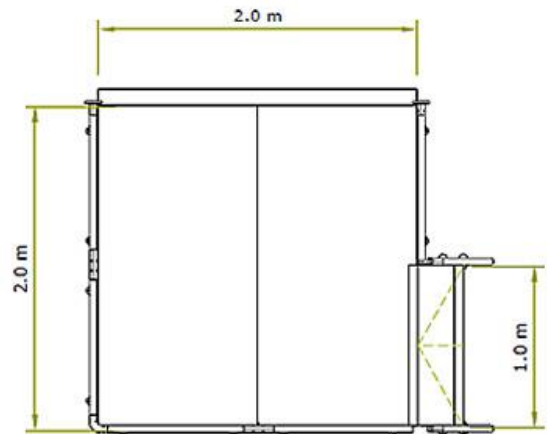

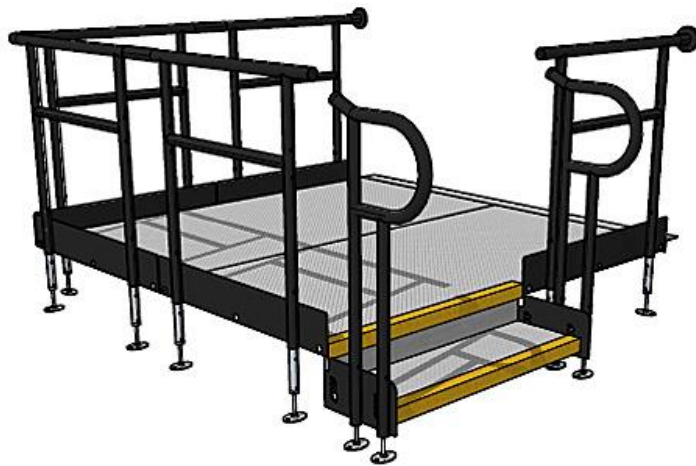

Each step unit can be flat packed and strapped down within the cabin ready for the next site.

ADDITIONAL INFORMATION: CAD drawing were designed by our specialist designer in-house.

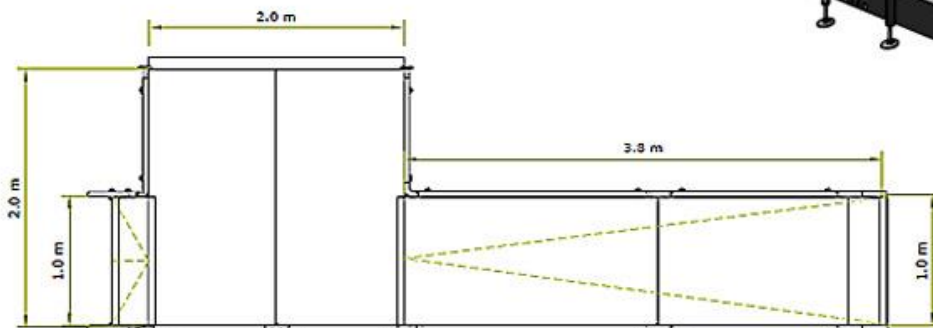

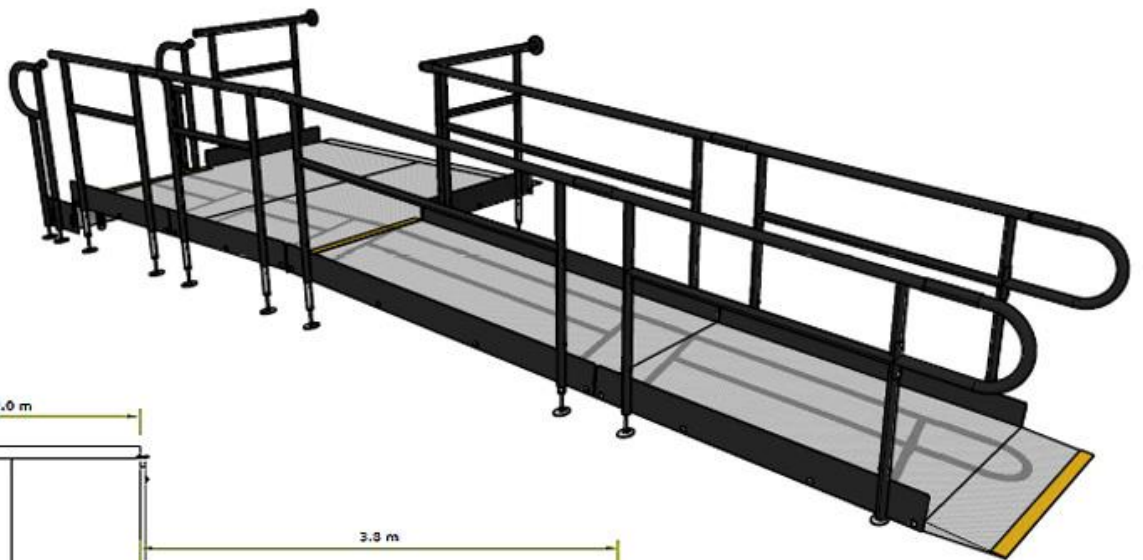

STEP-UNIT D

STEP-UNIT A

RAMP B

END RESULT: Installation was completed within three days.

Step Unit D has a low threshold height; therefore, a platform was unnecessary. However, all other units include one.

Ramp E includes a joining platform with a width of 2.7 m, providing appropriate turning space for wheelchairs and trolleys, and both ramps have a compliant 1:15 gradient.

FEATURES INCLUDED:

- Trombone Ends - these are added to the ends to prevent clothes catching.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Standard Handrail - this handrail system ensures users always have support to hold onto.
- Standard Colour Black – Systems are powder coated black to create a durable finish that is tougher than conventional paint.
- Telescopic Legs - legs can be adjusted to accommodate different threshold heights.

EXTRA FEATURES INCLUDED:

- Yellow Tread - this is a safety feature designed to help those with impaired vision identify the nose of the ramp. Additionally, it helps users distinguish any level changes.
- Infill Handrail - included on step unit linked with Ramp E. The product prevents users from climbing or falling through gaps.
