

Lorry Park, Kent

PROJECT BACKGROUND & REQUIREMENT:

The park manages customs and document inspections for cross-channel lorries.

It became evident that the external cabling and pipework were preventing wheelchair users from safely accessing the welfare cabins and offices.

To overcome this, a walkway was urgently needed to provide safe and accessible passage.

DESIGN PHASE:

Upon receiving the survey notes, our in-house design team promptly developed a 3D model and 2D plan for the project.

These were included with the customer's quotation and emailed back within 24 hours.

APPLICATION

Public Spaces

LOCATION

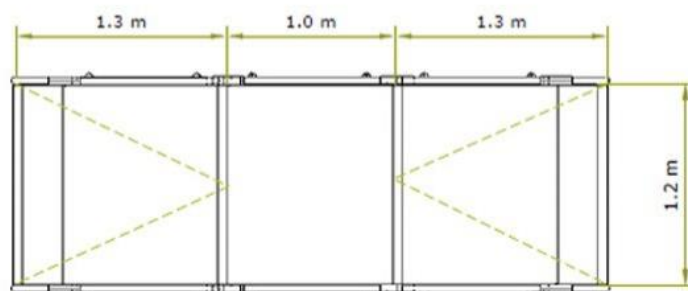

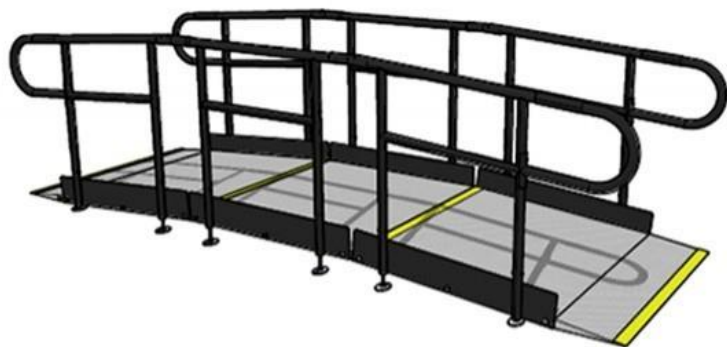

Lorry Park, Kent

SYSTEM

Temporary Walkway

SERVICE PACKAGE

Hire

INSTALLATION:

Our in-house team managed every stage - from design and manufacturing to installation.

The walkway was installed in under an hour and designed with a 1:12 gradient to achieve the required elevation, allowing it to seamlessly bridge over existing pipes and cabling.

At the end of the hire period, the modular system will be efficiently dismantled and returned to our warehouse for storage and reuse on future projects - maximising resource efficiency and minimising waste.

In contrast, concrete and timber walkways are permanent installations, making them unsuitable for temporary applications.

Their removal often results in material waste, higher disposal costs, and a greater environmental impact.

FEATURES INCLUDED:

- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Standard Colour: Black - Powder-coated black finish for greater durability than traditional paint.
- Adjustable Telescopic Legs - Adaptable to various threshold heights.
- Standard Handrail – Designed to be grasped for stability and support.
