

CASE STUDY: **Basingstoke Hospital**

TEMPORARY STEPS TO A MOBILE TRAILER

BACKGROUND: A mobile trailer was adapted into a Covid PCR Testing Laboratory.

The staff test 6-7 thousand saliva pots every three weeks.

REQUIREMENT: Temporary modular steps to replace the existing ones to the trailer.

The current steps were too steep and narrow, with no handrails and platform.

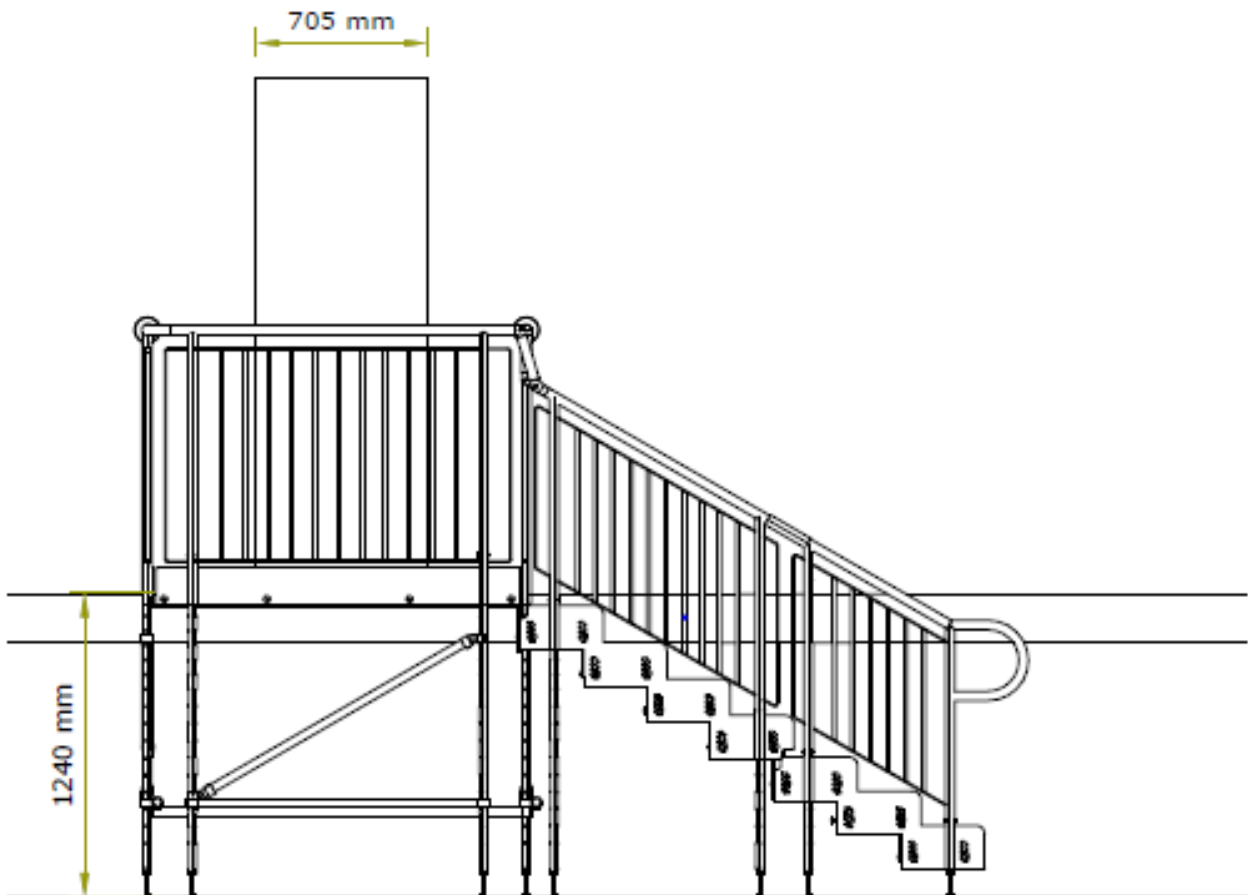

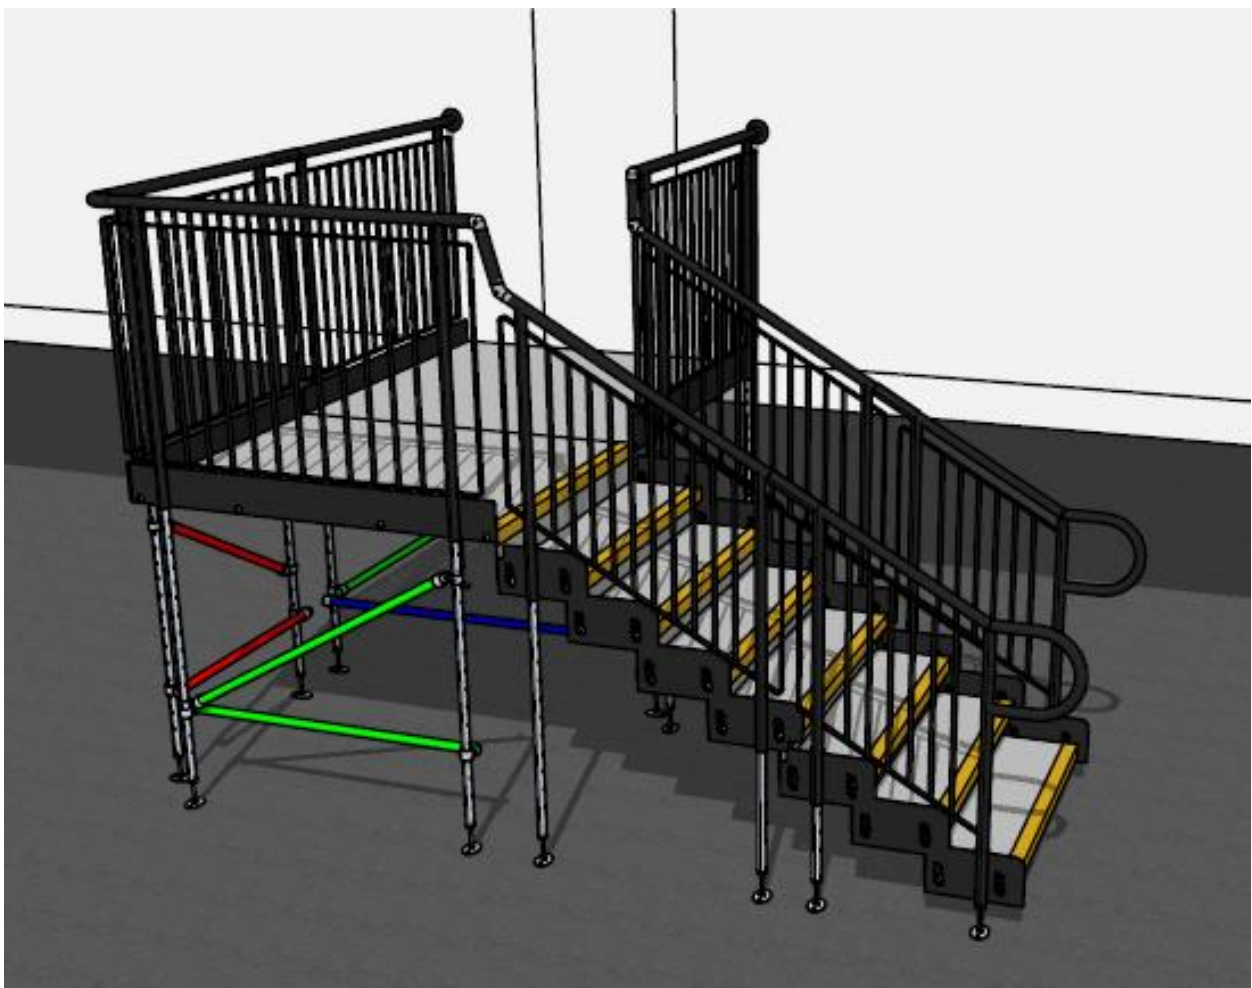

ADDITIONAL INFORMATION: CAD and technical drawings were created by our designer in-house.

Application: Healthcare

Location: Basingstoke, Hampshire

System: Fully Compliant Steps

Service Package: Ramp Hire

END RESULT: We installed fully compliant steps, which included infill handrails and a platform for turning space.

We matched the hire period for the mobile laboratory. Once no longer needed, the steps will be removed by our installation team. Removal is a service included in our [rental package](#).

The steps are fully compliant with [documents M & K of the building regulations](#).

FEATURES INCLUDED:

- Infill Handrail - this product prevents users from climbing or falling through gaps.
- Yellow Tread - this is a safety feature designed to help those with impaired vision identify the nose of each step. Additionally, it helps users distinguish any level changes.
- Trombone Ends - these are added to the ends to prevent clothes catching.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Continuous Handrail - this handrail system ensures users always have support to hold onto.

TEMPORARY STEPS FOR HIRE:

[Temporary steps](#) are available for short or long-term hire.

Hire includes:

- Free quotation with technical and 3D CAD drawings
- Site survey (If applicable)
- Installation
- Removal
- The minimum hire period applies, and the rental duration is flexible (more details available on application).
