

Tintagel Castle Footbridge

REQUIREMENT:

The Tintagel Castle Footbridge connects the two sections of the Castle.

During essential maintenance work, a temporary walkway was required to provide workers with safe, slip-resistant access. Given the bridge's exposure to harsh weather conditions, it was imperative to implement a durable and impact-resistant solution.

Our modular walkway proved to be the ideal choice. Engineered with safety in mind, it features a slip-resistant surface with small mesh openings that facilitate efficient water drainage, thereby significantly reducing the risk of slips and falls.

Additionally, the steel handrails are coated with nylon, a material known for its low thermal conductivity. This ensures that the handrails remain comfortable to the touch, even in cold and damp conditions.

DESIGN PHASE:

Our in-house design team produced a detailed 3D model and 2D plan of the walkway layout, which were included with the client's quotation to assist with planning and approval.

APPLICATION

Public Structure

LOCATION

Tintagel, Cornwall

SYSTEM

Modular Walkway

SERVICE PACKAGE

Ramp Rental

INSTALLATION:

Once the PO was approved, the components were swiftly picked, packed, and dispatched within 24 hours. The contractor's in-house installation team efficiently installed the walkway, using our instructional video and manual as a guide.

Upon completion of the work, the walkways will be dismantled, with delivery scheduled as necessary. The components will then be stored in our warehouse, ready for reuse in future rental projects.

FEATURES INCLUDED:

- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Standard Colour: Black - Powder-coated black finish for greater durability than traditional paint.
- Adjustable Telescopic Legs - Adaptable to various threshold heights.
- Anti-climbing Infill Handrail - Prevents users from climbing or falling through gaps.
- Slip-Resistant Yellow Tread - Enhances safety by making step edges and level changes more visible to those with impaired vision.
