

CASE STUDY: **University Graduation Ceremony**

TEMPORARY ACCESS TO THE GRADUATION VENUE

REQUIREMENT: A marquee company required a temporary ramp and step unit for their graduation tent.

They wanted to purchase the systems, with the intention of reusing them in future projects.

ADDITIONAL INFORMATION: The company's installation team would assemble the products using our 'how to' video guide.

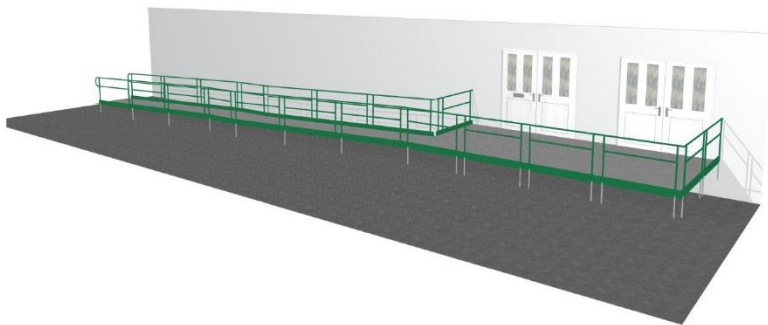

We quoted and produced technical and CAD drawings, with reference to the finished floor height measurement supplied.

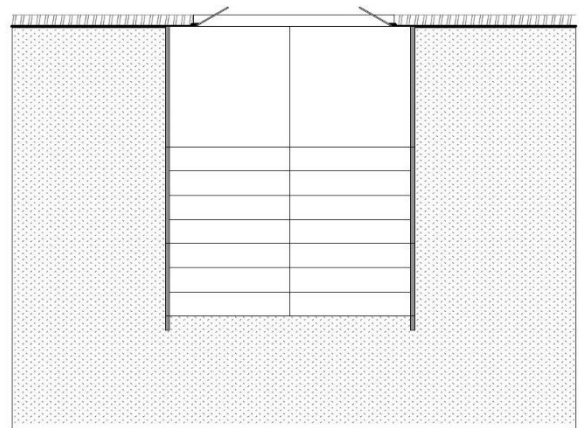

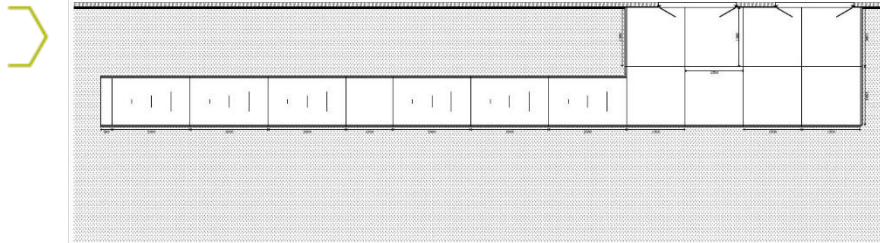

Application: Modular Building & Education

Location: London

System: Standard Ramp System

Service Package: Supply Only

END RESULT: A Rapid Ramp and step unit were manufactured, designed, and delivered to site, ready to be assembled.

FEATURES INCLUDED:

- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Standard Handrail - this is designed to be grasped by the hand, to provide stability or support.
- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.

EXTRA FEATURE INCLUDED:

- Step Unit - an ideal addition to any ramp installation, providing the access needed for able-bodied users. They can also be stand-alone units, independent of the Rapid Ramp System.

SUPPLY ONLY: No site survey is included, but a quotation with CAD and technical drawing, plus a copy of our installation video is provided.

As a manufacturer and stockist, you'll find our delivery times are much faster!

“

The ramp worked well and fitted perfectly!

Director, Marquee Company
