

**Application:** Education

.....

**Location:** Harrow, London

.....

**System:** Standard Ramp System

.....

**Service Package:** Supply & Install

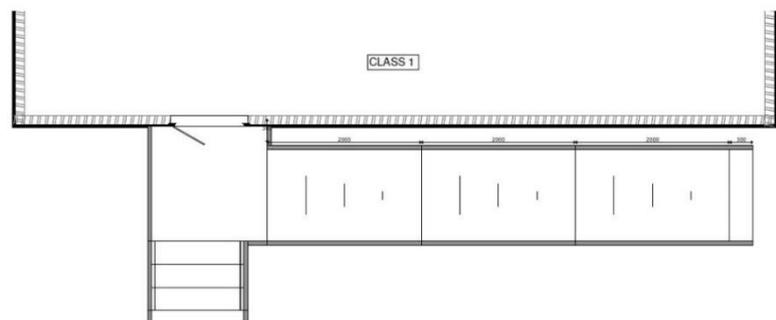

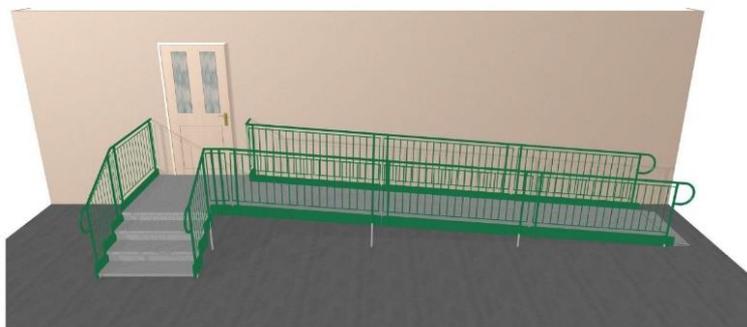

.....

## CASE STUDY: **Uxendon Manor Primary School** **SCHOOL EXPANSION PROJECT**

**REQUIREMENT:** As part of the expansion project, a double classroom block with ramps and steps were required.

The architect additionally specified infill handrails and yellow tread for safety.

**ADDITIONAL INFORMATION:** CAD and technical drawings were designed by our specialist CAD designer in-house from measurements and photos taken by our site surveyor.

**END RESULT:** After the modular classrooms had been assembled, three Rapid Ramps with steps were installed.

All work was completed within the summer holiday.

#### **FEATURES INCLUDED:**

- Mesh Platform - self-draining mesh allows water to pass through rather than collect on the surface.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Telescopic Legs - these can be adjusted to accommodate different threshold heights.
- Standard Continuous Handrail - this handrail system ensures the users always have support to hold onto.

#### **EXTRA FEATURES INCLUDED:**

- Infill Handrail - this product prevents users from climbing or falling through gaps.
- Yellow Tread - this is a safety feature designed to help those with impaired vision identify the nose of the ramp and helps users distinguish any level changes.
- Standard Underside Mesh - this is designed to prevent children from gaining access underneath the ramp. It is often specified for schools and public buildings.
- Step Units - an ideal addition to any ramp installation, providing the access needed for able-bodied users. They can also be standalone units, independent of the Rapid Ramp System.

**THE COMPLETE RAMP PACKAGE:** An all-inclusive, stress-free option which we managed in-house.

This package includes a site survey (if applicable), quotation, CAD and technical drawing, supply, and installation.

**Recently you completed three ramp installations at Uxendon Manor Primary School in North West London, which went well.**
