

West Kent Community Diagnostic Centre

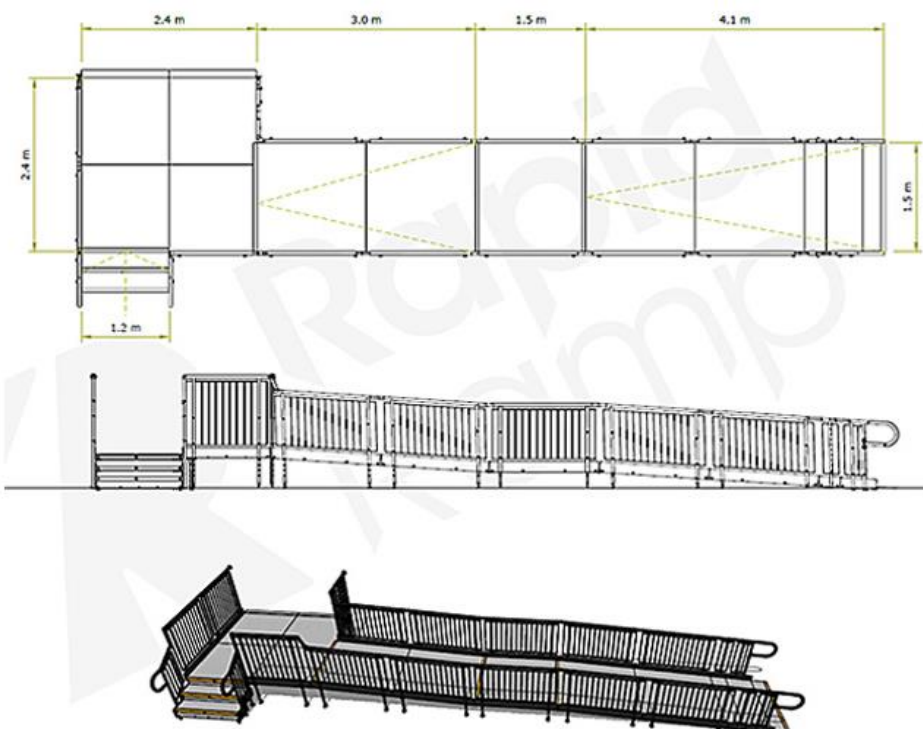

REQUIREMENT:

Modular ramped access to the mobile MRI scanning unit.

Both the trailer and the Rapid Ramp System boast a versatile modular design, allowing relocation to accommodate any site changes if necessary. In contrast, a concrete or wooden ramp, functioning as a single-use system, lacks the same level of adaptability.

CAD DRAWINGS:

These were produced internally, utilising the architectural drawings supplied by the client.

APPLICATION

Modular Building

LOCATION

Maidstone, Kent

SYSTEM

Fully Compliant Modular Ramp & Steps

SERVICE PACKAGE

Ramp Rental

END RESULT:

After the mobile unit was in position, a compliant Rapid Ramp was efficiently installed within a day.

This ramp conforms to Building Regulations Parts M and K, and the feet, situated over loose gravel, were securely fastened to concrete slabs to enhance stability.

Our systems can be installed on a variety of surfaces, including concrete, tarmac, artificial grass, gravel, and muddy terrain.

Upon completion of the rental duration, the system will be dismantled and incorporated into a rental stock rotation.

FEATURES INCLUDED:

- Infill Handrail - This product safeguards against users climbing or falling through gaps.
- Yellow Tread - A safety feature designed to help those with impaired vision identify the system's nose and any level changes.
- Trombone Ends - Installed at the ends of a Rapid Ramp to prevent clothes from snagging.
- Mesh Platform - Self-draining mesh allows water to pass through, preventing surface accumulation.
- Continuous Handrail - This handrail system ensures that users always have a support to hold onto.
- Standard Colour: Black - Our ramps boast a powder-coated black finish, ensuring durability beyond typical paint.
- Adjustable Telescopic Legs - these can be adapted to suit various threshold heights.

EXTRA FEATURE INCLUDED:

- Fully Compliant Step Unit - The perfect companion to any ramp setup, delivering the necessary access for able-bodied users. They can also function as standalone units, operating independently of the Rapid Ramp System.
